

# Eaves Comb (Bird Comb)

## Description

The Ulti-Mate® Eaves Comb (Bird Comb) is used to prevent birds and vermin from entering the batten cavity, behind profiled roofing tiles. They are available in 1,000 mm Lengths.

## Benefits

- Prevent birds, rodents and other wildlife
- Suitable on profiled roof tiles
- Supplied in 1,000 mm lengths

## Guidelines for use

Place the Eaves Comb (Bird Comb) directly onto the eaves guard/felt support tray, mechanically fix with correct nails (select type based upon the material of the Soffit Board e.g. timber or cellular), through the nailing holes (also through Eaves Guard i.e. 5U or UST and Fascia Vent if fitted) into the fascia board.

All products are covered by our 15 year Durability Warranty terms and conditions can be found on our website.

All plastic products are made in UK.
